

SCOUTING REPORT

Prepared by Tobias Galante — Football Scout | Technical Report

PLAYER DATA

Name: Quim Junyet
Date of birth: 25/03/2007
Nationality: Spain
Position: Central Midfielder / Attacking Midfielder
Preferred foot: Ambidextrous
Height: 1.71 m
Current club: Barça Juvenil A
Contract until: 30/06/2026
Agent: LIAN Sports Group
Report date: 23/06/2025

EXECUTIVE SUMMARY

Quim Junyet is a midfielder with great potential, ideally suited as a left interior in a 4-3-3. His profile is that of an offensive 'brain', standing out for his intelligence and technique to influence every phase of the game. He is a player with an outstanding technical and tactical foundation, superior game intelligence, and great dynamism.

TECHNICAL ANALYSIS

He possesses exceptional control, first touch, and ball manipulation, creating passing angles in any area of the pitch. His ambidexterity is notable, broadening his range of options, and his dribbling in movement is excellent, combining speed and cunning to beat opponents. He has a vast passing repertoire and a complete game vision, reflected in his ability to play one- or two-touch football and make effective pauses when receiving the ball.

TACTICAL ANALYSIS

Tactically, he is key in high pressing and ball recovery, showing an excellent understanding of positional play. He moves intelligently to constantly present himself as a passing option, facilitating build-up play. In attack, his offensive mindset is clear: he quickly turns to advance, seeks passes between the lines, and acts as a co-organiser, dictating the tempo of the attack. He shows offensive projection through off-ball runs and box arrivals to finish, although he sometimes takes too many risks with complex passes or unnecessary feints.

PHYSICAL AND MENTAL ASPECTS

Physically, he uses his frame to be quick and unbalance opponents, and his balance is a strength that helps him in dribbling and changes of direction; however, his small build is an area for improvement, as he occasionally loses physical duels or struggles to shield the ball against stronger players. He is a player with great commitment and quiet leadership: he constantly demands the ball, takes charge of initiating play, and shows high footballing intelligence. His spatial awareness is outstanding for his age, always anticipating his next pass, and he communicates actively with his teammates. A critical aspect to work on is his defensive transitions: when he loses the ball, he can be slow to react to recover it, a point that could be exploited by higher-level opponents.

KEY DATA POINTS (U19 EUROPEAN CHAMPIONSHIP, SOFAScore DATA)

- 5 matches played; 3 goals; 2 assists.
- 25.2 accurate passes per match (91%); 20.4 accurate passes in the opposition half (92%); 1.8 accurate long balls (82%).
- High volume of touches and key passes per match, reflecting a constant leading role in his team's circulation.

SIMILAR PLAYERS

- Leo Messi

STRENGTHS AND WEAKNESSES

Strengths

- Exceptional control, first touch, and ball manipulation.
- Notable ambidexterity and excellent dribbling in movement.
- High footballing intelligence and outstanding spatial awareness for his age.

Areas for Improvement / Limitations

- Small physical build, with difficulties in physical duels against stronger opponents.
- Tendency to take excessive risks with complex passes or unnecessary feints.
- Slow reaction during defensive transitions after losing the ball.

PROJECTION AND CONCLUSION

Quim Junyet is a midfielder with an outstanding technical and tactical foundation, superior game intelligence, and great dynamism. Improving his physical strength and discipline in defensive transitions will be determining factors for his consolidation as an elite footballer.
